Sunlit Gold

Midnight Blue Platinum

Silver Frost

Parallel Architectural Products' Metallic Collection offers essential, brilliant metal tones perfect for projects needing a touch of luminosity. With a smoother texture than our standard solid colors, **Silver Frost, Sunlit Gold, and Midnight Blue Platinum create a high-shine aesthetic that sparkles in the light.**

This specialized color palette draws inspiration from anodized aluminum but achieves its effect through **premium powder coatings and the industry's most precise application process.** Every aluminum profile coated with a Parallel metallic finish is both **lustrous and dynamic** — while maintaining the durability, longevity, and vibrancy our products are known for.

LUMINOUS, SPARKLING AND ENERGETIC

## How do you apply metallic finishes to your projects?

### Commercial Facades

Perfect for cladding on a retail space or restaurant; great paired with other solid finishes including custom brand colors!

### Batten Accents

Create an interior or exterior batten wall to provide a sophisticated design element to commercial and residential spaces.

### Decorative Screens

Use metallic slats for a decorative exterior screen element, or to create a functional privacy screen that shines a little brighter.
